

Treasury Acquisition Data System (TADS)

What:

- A relational database system that collects and reports Department of the Treasury offices and bureaus procurement information to the Federal Procurement Data System (FPDS), Office of Federal Procurement Policy, Congress, and the general public

Why:

- Produces more accurate, timely procurement information than FPDS
- Allows Treasury to monitor procurement performance metrics (competition, socio-economic, cost-to-spend, etc.)

Treasury Acquisition Data System (TADS)

Background:

- Developed by HHS in 1996 (franchised to Treasury under IA)
- Fully tested and certified Year 2000 compliant (Logistics Management Institute)
- Replaced old non-Y2K Treasury Procurement Data System (TPDS)
- Java platform version implemented in FY2000
- Web browser version implemented in FY2002 (less overhead)
- Captures all small purchases (SF-281), large dollar contract (SF-279) data

Treasury Acquisition Data System (TADS)

Features:

- Current with all Federal Procurement Data System (FPDS) changes
- Automatic loading of vendor information through a Dun & Bradstreet contractor data base (less typing)
- Automatic population of the data fields for new modifications, task orders and delivery orders against existing contracts in the system (less typing)
- User login via web browser. Available 24 hours a day/7 days a week
On going technical support/help desk (301) 231-9898 x174
- On-line error checking
- Flexible report features

Treasury Acquisition Data System (TADS)

FPDS background:

All executive branch agencies report procurement information to the Federal Procurement Data System (FPDS), whose mission is to provide a comprehensive mechanism for assembling, organizing, and presenting contract placement data for the Federal Government to interested parties.

Treasury Acquisition Data System (TADS)

FPDS data provides:

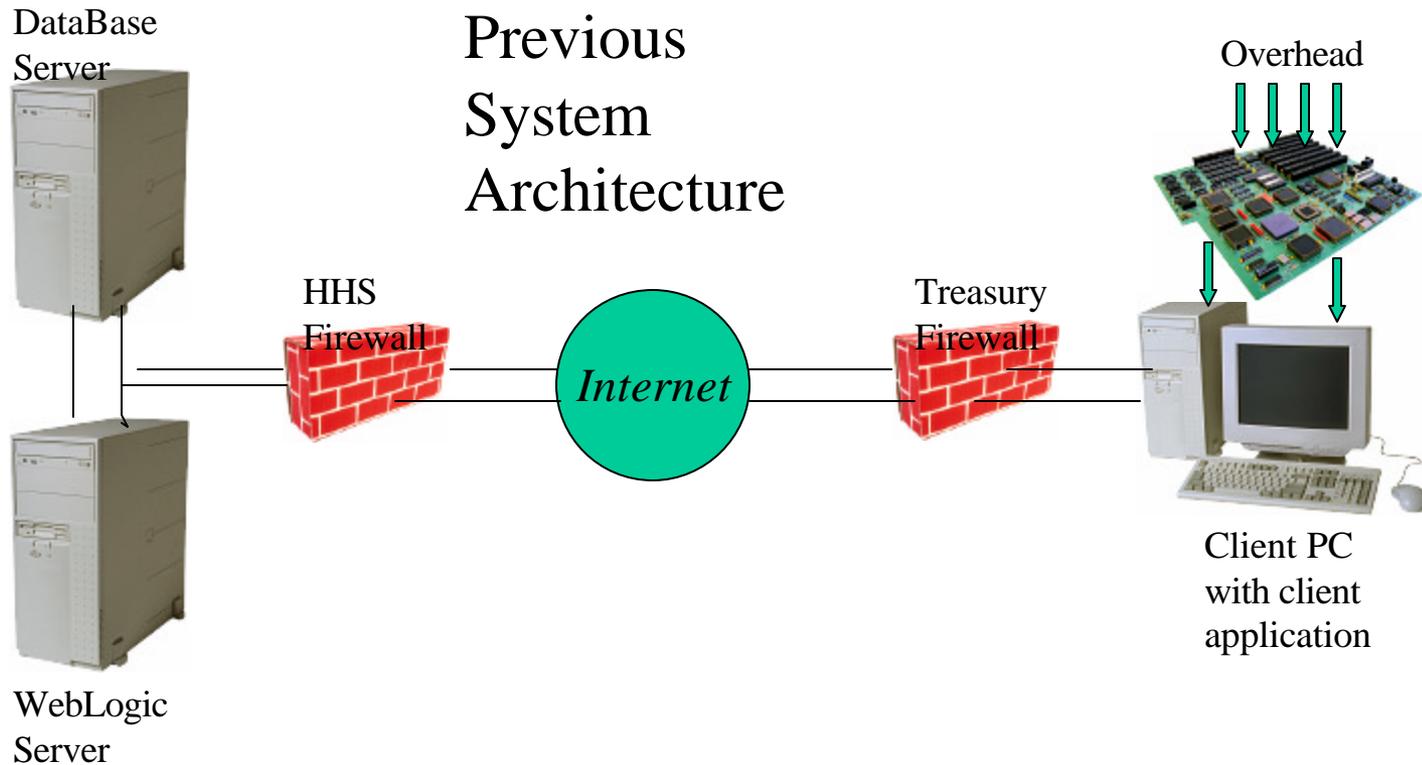

- recurring and special reports to the President, the Congress, the General Accounting Office, Federal executive agencies, and the general public;
- a means of measuring and assessing the impact of Federal contracting on the Nation's economy and the extent to which small, veteran-owned small, service-disabled veteran-owned small, HUBZone small, small disadvantaged, and women-owned small business concerns are sharing in Federal contracts; and
- data for other policy and management control purposes, such as acquisition workforce planning.

Treasury Acquisition Data System (TADS)

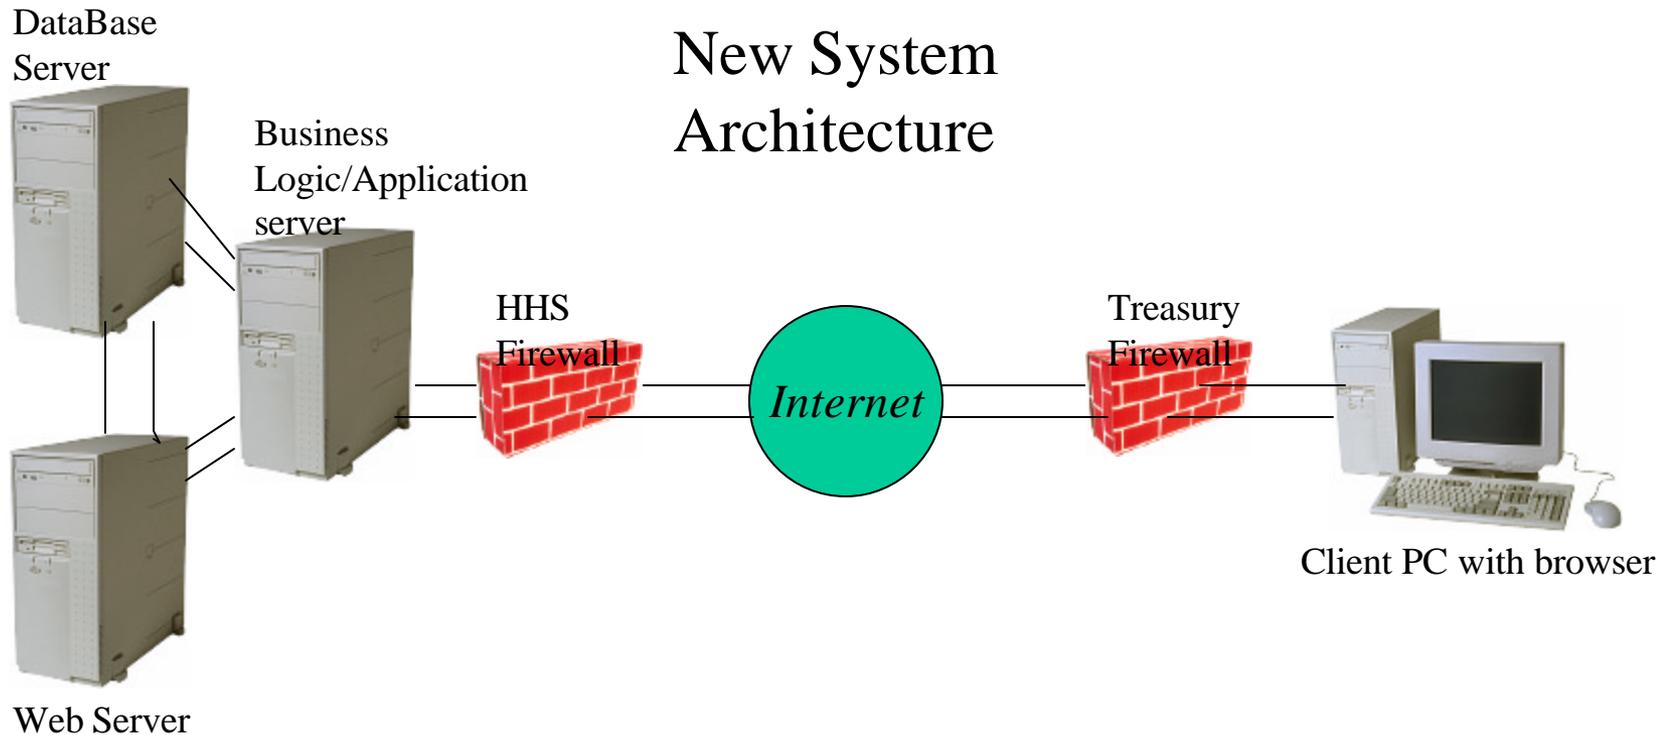

TADS data provides:

- **Batch processing status reports**
- **Standard quarterly/annual reports (socio-economic, agency performance metrics – competition, PBSC)**
- **Special request reports (FOIA's Congressional inquiry)**
- **History of all transactions sent to FPDS**

Treasury Acquisition Data System (TADS)

Treasury Acquisition Data System (TADS)

Treasury Acquisition Data System (TADS)

TADS reporting schedule:

DTAR Appendix A -

SF-279 (ICAR) - report by January 15th April 15th July 15th October 31st,
via TADS

SF-281 (Summary Contract Action Report (\$25,000 or Less)) - report
by January 15th April 15th July 15th October 31st , via TADS

Treasury Acquisition Data System (TADS)

Two ways to submit procurement information:

Batch Processing

- Easy uploading of reportable actions directly from agency contract management system
- All contract actions are reported collectively
- Quarterly or periodic updates

On-line Processing

- Each contract action is reported individually
- Interactive edits
- Lookup & validation tables
- Real time updates

Treasury Acquisition Data System (TADS)

TADS next step:

- Web based report tool for generating ‘ad-hoc’ and special reports (Oracle 9iApplication Server)

TADS next generation:

- (“E-Portal”) Collect data directly from contract writing systems via Web Services
- “E-Portal” will enable a variety of procurement reports from TADS, contract writing and other systems

Treasury Acquisition Data System (TADS)

FPDS Next Generation:

- **Component of the Integrated Acquisition Environment (Quicksilver initiative)**
- **Streamline the collection of procurement data from any type of contract or instrument**
- **Reduce the cost of data collection**
- **Facilitate data sharing across business functions**
- **Provide accurate, real time information for strategic decision making and planning**
